Student Engagement and Quality Assurance in Higher Education

International Collaborations for the
Enhancement of Learning

Edited by **Masahiro Tanaka**

Using a range of international examples to compare the reality, purpose and effect of student engagement in universities across the globe, this book argues that teachers and students need to collaborate to improve the quality of university education and student learning. With case studies from ten countries covering a variety of cultural and environmental settings, it focusses on ways of working with students to produce applicable, implementable strategies for universities the world over. This book is essential reading for educational researchers, institutional leaders and all concerned with the implementation and progression of student engagement and quality assurance in higher education.
